# CHHOTE SCIENTISTS

## 05.01.2026

- The Chhote Scientists – Physical Science Activity was conducted to develop students' curiosity and scientific thinking through simple, hands-on experiments. Students actively participated in activities related to states of matter, magnetism, light and shadow, floating and sinking, and push and pull forces. Through observation and experimentation, they learned to identify changes, compare objects, and understand cause-and-effect relationships in an engaging way.
- The programme also strengthened their reading skills by encouraging them to read short science passages, follow experiment instructions, and identify key scientific terms. Writing skills were enhanced as students recorded their observations, labeled diagrams, and wrote a few sentences about their learning. These activities helped improve their understanding, analytical thinking, and confidence in expressing scientific ideas clearly. The Chhote Scientists activity made learning physical science enjoyable, practical, and meaningful for young learners.
